

TOMATO CLASS™

A CHOICE FOR EXCELLENCE
IN GRADING MACHINERY

Food Automation
ENGINEERED FOR EXCELLENCE IN MACHINERY

THE TOMATO CLASS™

DESIGNED TO HANDLE YOUR TOMATOES DELICATELY

Our grading machines are equipped with a gentle discharge system using surgical grade silicon curtains to reduce speed and minimize impact to the tomatoes.

By achieving the lowest transfer height in the industry, we have accomplished the best handling of your tomatoes.

“OUR MACHINERY IS EQUIPPED WITH THE MOST ADVANCED TECHNOLOGY IN THE INDUSTRY”

- SERGIO CASCO | ELIFAB SOLUTIONS | SPAIN

FASTEST MACHINE IN THE INDUSTRY

Each lane can process 36 fruit pockets (rollers) per second, allowing high productivity while maintaining world class accuracy. With an average weight of 10 grams per cherry tomato and a reasonable pocket fill of 65%, the productivity is 842 kilograms (1856 lb) per hour per lane.

36 CHERRY TOMATOES P/S
842 KG/H PER LANE

MOST COMPACT MACHINE IN THE INDUSTRY

We know how important it is for your business to have compact sized machinery. Therefore our machines are designed to have the smallest footprint possible. The resulting benefits are:

- Quick installation
- Easy maintenance
- Optimum performance
- Runs smoothly and silent
- Built to last

SMALLEST FOOTPRINT

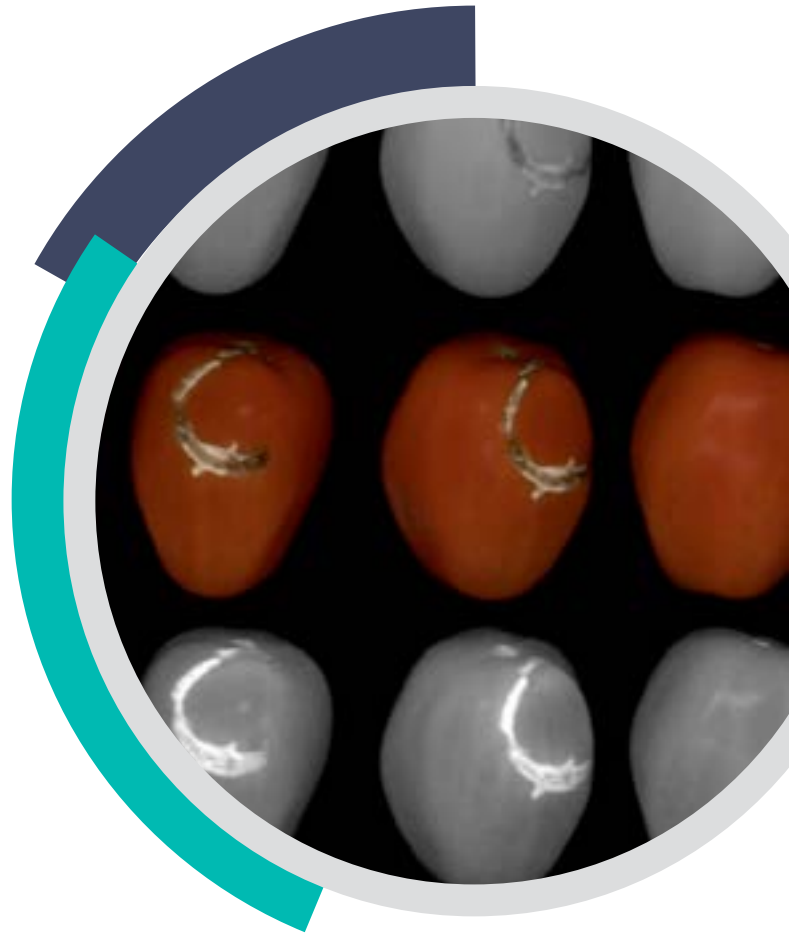

a 12 lane sizer, with 14 exits is smaller than 16m in length and has a total surface area of 32m².

NEXT LEVEL GRADING

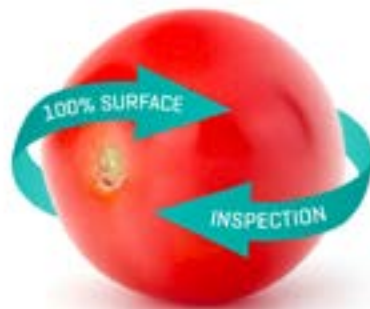

The Tomato Class is equipped with the latest Ellips grading technology. We use HD+ multispectral cameras (3.2 megapixel) to take 30 different images per cherry tomato. This results in near-perfect size (submillimeter) and color separation and highly accurate sorting on defects.

TRUESORT™ SOFTWARE

Ellips TrueSort™ software lays at the heart of each Elifab sorting line. It can interface seamlessly with your packhouse management system. With our user friendly software you can fine tune your sorting process to deliver consistent quality and get premium prices for your products.
